ADD Gateway

INSTRUCTIONS TO CONNECT GATEWAY

Security Gateway

Gaia Embedded R80.x

Prerequisites

Before connecting the SMB Security Gateway to the Service, make sure that the gateway is aligned to the [latest firmware release](#).

How To Connect

1. Connect to the SMB Security Gateway WebUI.
2. Navigate to Security Management page
3. Choose Central as the Security Management Option and Click on Apply
4. Click on Setup under Security Management Server
5. Check the Use Security Management Service and click on Next
6. Copy the following authentication token

```
ah  
L  
NjEtNDZMc1hNDIwLTU4NjgxMTY0NlQwYw==
```

7. Paste it in text area (Management Service Connection page) and click on Connect

SECURITY MANAGEMENT SERVER CONFIGURATION WIZARD

Security Management Service Connection

Use the [infinity portal](#) to generate a new authentication token and copy it to the textbox below

CLOSE

SECURITY MANAGEMENT SERVER CONFIGURATION WIZARD

Welcome to the Security Management Server Configuration Wizard

The **Quantum Spark 1500 Appliance** 'Connect to Security Management Server' Configuration Wizard will guide you through the steps required to connect to the Security Management Server, establish trust and fetch the security policy. If you are not sure how to proceed, click Cancel and obtain the missing information from the Security Management Server administrator. To continue, click Next.

Use Security Management Service

Check Point's best-in-class management solution now available as a service. Smart-1 Cloud provides you with full management capabilities such as policy management, device management, log analysis, reporting and log retention.
