- Mail Transfer Agent
- IPSec VPN
- VPN Clients
- Mobile Access
- Monitoring Software bla
- Logs
- Fetch Policy
- Optimizations
- Hit Count
- Other

Please follow these steps in order to enable HTTPS Inspection:

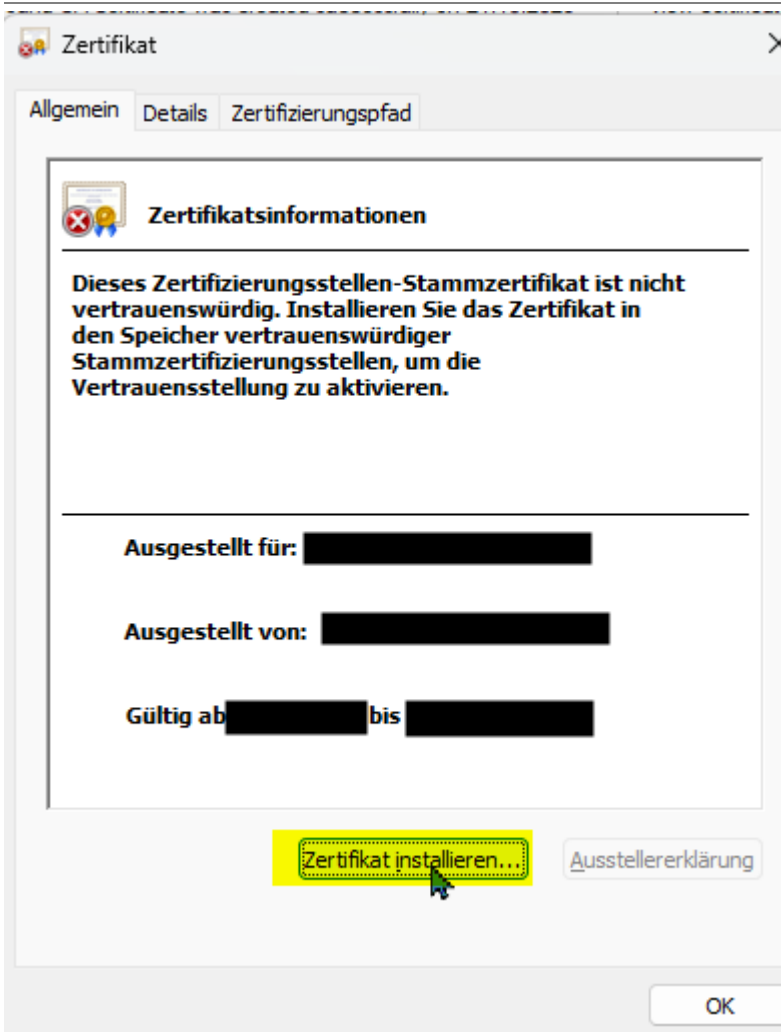

Step 1
 **Create** or [Import](#) an outbound CA Certificate for HTTPS Inspection

Step 2
 Deploy the outbound certificate in your organization [Learn more...](#)

 Activating HTTPS Inspection on your Security Gateway without deploying the outbound CA Certificate will result in SSL error messages when accessing HTTPS sites.

Step 3
 Enable HTTPS Inspection

OK Cancel

Willkommen

Dieser Assistent hilft Ihnen beim Kopieren von Zertifikaten, Zertifikatvertrauenslisten und Zertifikatssperrlisten vom Datenträger in den Zertifikatspeicher.

Ein von einer Zertifizierungsstelle ausgestelltes Zertifikat dient der Identitätsbestätigung. Es enthält Informationen für den Datenschutz oder für den Aufbau sicherer Netzwerkverbindungen. Ein Zertifikatspeicher ist der Systembereich, in dem Zertifikate gespeichert werden.

Zero Phishing Error: In-browser Zero Phishing protection might not work properly. Users are not protected from advanced phishing attacks. To protect your users, follow the instructions in sk177023.

Configuring the Application Control and URL Filtering Software Blades for Monitor Mode (checkpoint.com)

The screenshot displays the Palo Alto Networks configuration interface. In the background, a policy named "Standard" is being configured. The "Policy Types" section includes "Access Control & HTTPS Inspection" (checked), "Access Control" (with "VPN Traditional mode" unchecked), "Custom Threat Prevention", "Autonomous Threat Prevention", and "HTTPS Inspection" (Default Layer, Shared). A search bar at the bottom shows "No matches found for your search".

In the foreground, the "Layer Editor" dialog box is open, showing the "Blades" section. The "Blades" section includes:

- Firewall
- Applications & URL Filtering
- Content Awareness
- Mobile Access

 The "Preview" table below shows columns for Destination, VPN, Services & Applications, Action, Track, and Install On. The "Sharing" section has an unchecked checkbox for "Multiple policies and rules can use this layer".
